The Company's outlook on overseas markets and domestic markets is positive on account of its strength in technology, cost and power saving.

(f) RISKS AND CONCERNS:

Some of the risks that are potentially significant in nature and need careful monitoring are raw material price, availability of power among others. The Company is classified as an agriculture appliances industry, the growth of which is determined by the overall growth of agriculture, availability of inputs and the state of the global economy.

(g) INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The Company has a proper and adequate system of internal controls to ensure that all assets are safeguarded and protected against loss from unauthorised use. The Company's internal controls are supplemented by an extensive programme of internal audit, review by management and documented policies, systems support, guidelines and procedures.
