Leading by example.

CMD Mr. Dinesh Patidar is at the helm of affairs at Shakti Pumps (I) Ltd. His vision and strategic guidance have been instrumental in making us a strong force, nationally as well as internationally.

The foundation of Shakti Pumps (I) Ltd. was laid in 1982. From a humble beginning, we have gone from strength to strength to become India's largest manufacturer of submersible pumps and motors today.

An ISO 9001-2008 company, our cutting-edge manufacturing facility with an installed capacity of 5,00,000 pumps per annum is located in Central India at Pithampur (M.P.).

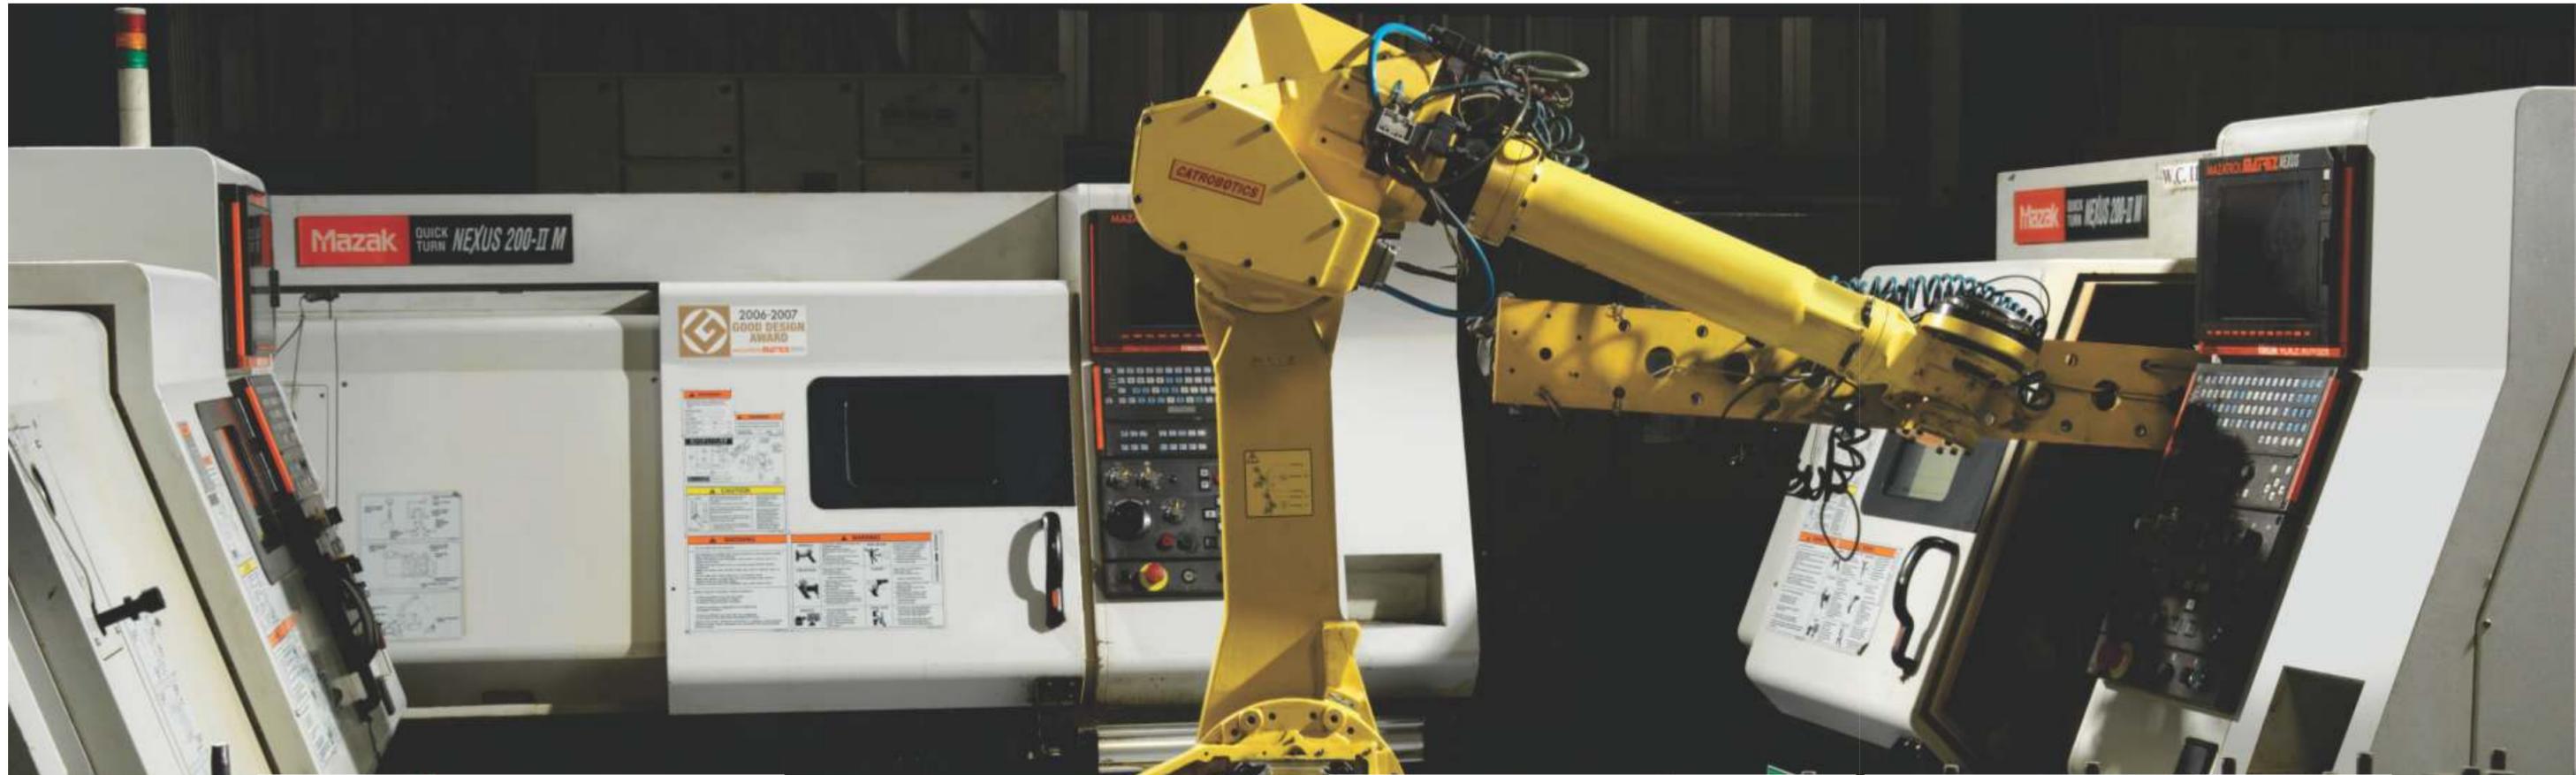

Quality, a way of life at Shakti.

We accord paramount importance to quality. Be it practices, procedures or people, each and every aspect of our company, comes together to ensure that customers get products and services of the highest quality.

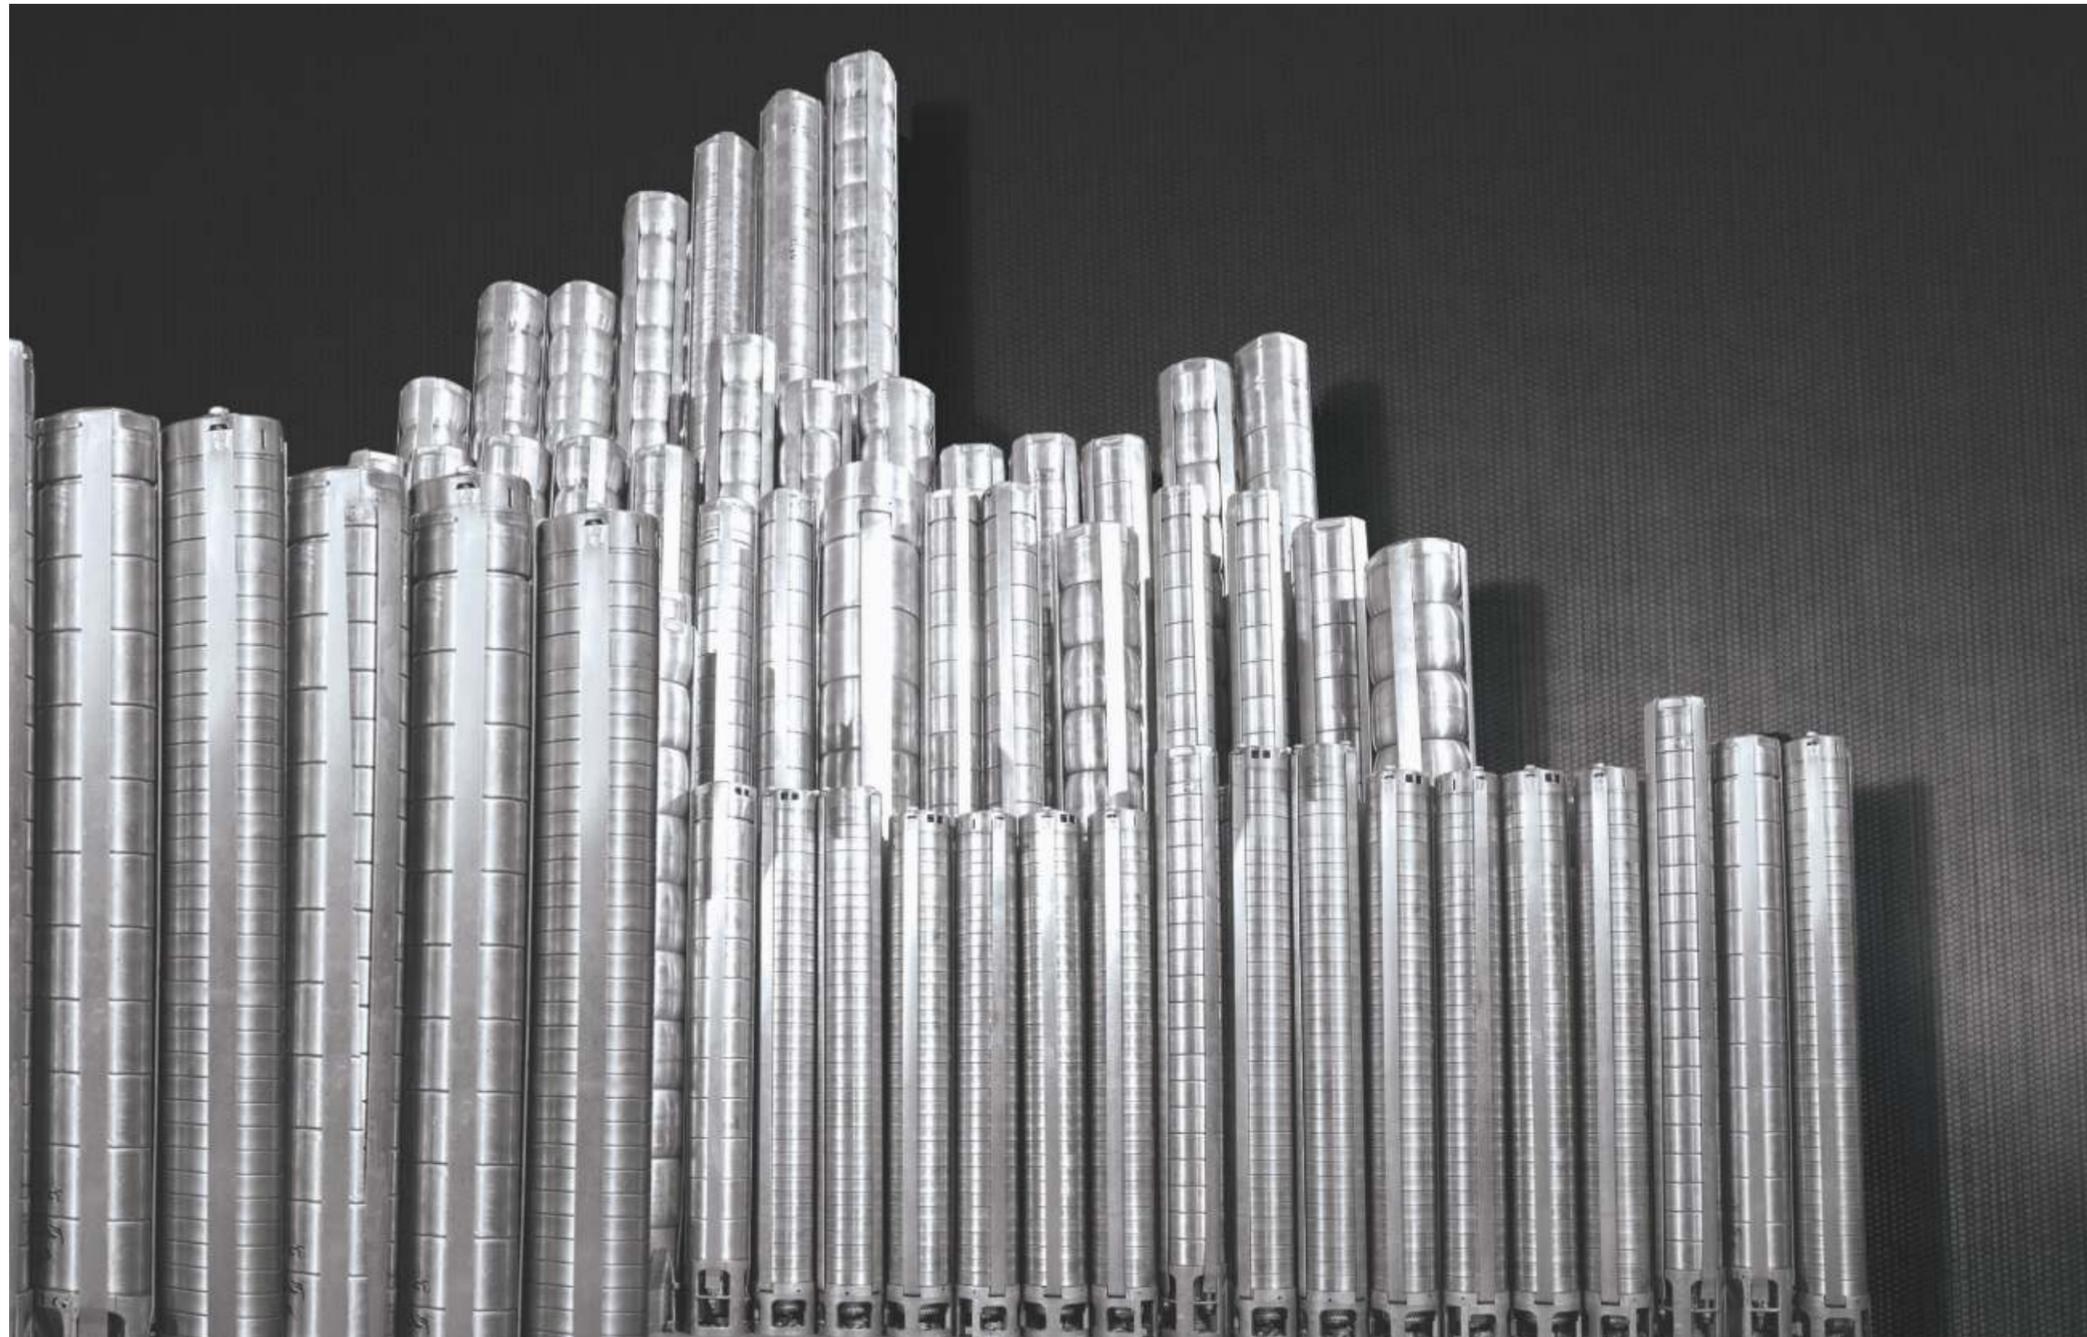

Our quality control and testing labs are amongst the most advanced set-ups in the country - enabling us to meet international quality standards consistently.

Our technology, our strength.

We employ the best-of-world technology to manufacture our products. Our state-of-the-art plant has cutting-edge Japanese and European machinery. The use of robots ensures precision of the highest level. Ultra-modern CNC machines, stamping machines, cathode electrode deposition plant, etc. speak volumes about our technological strength.

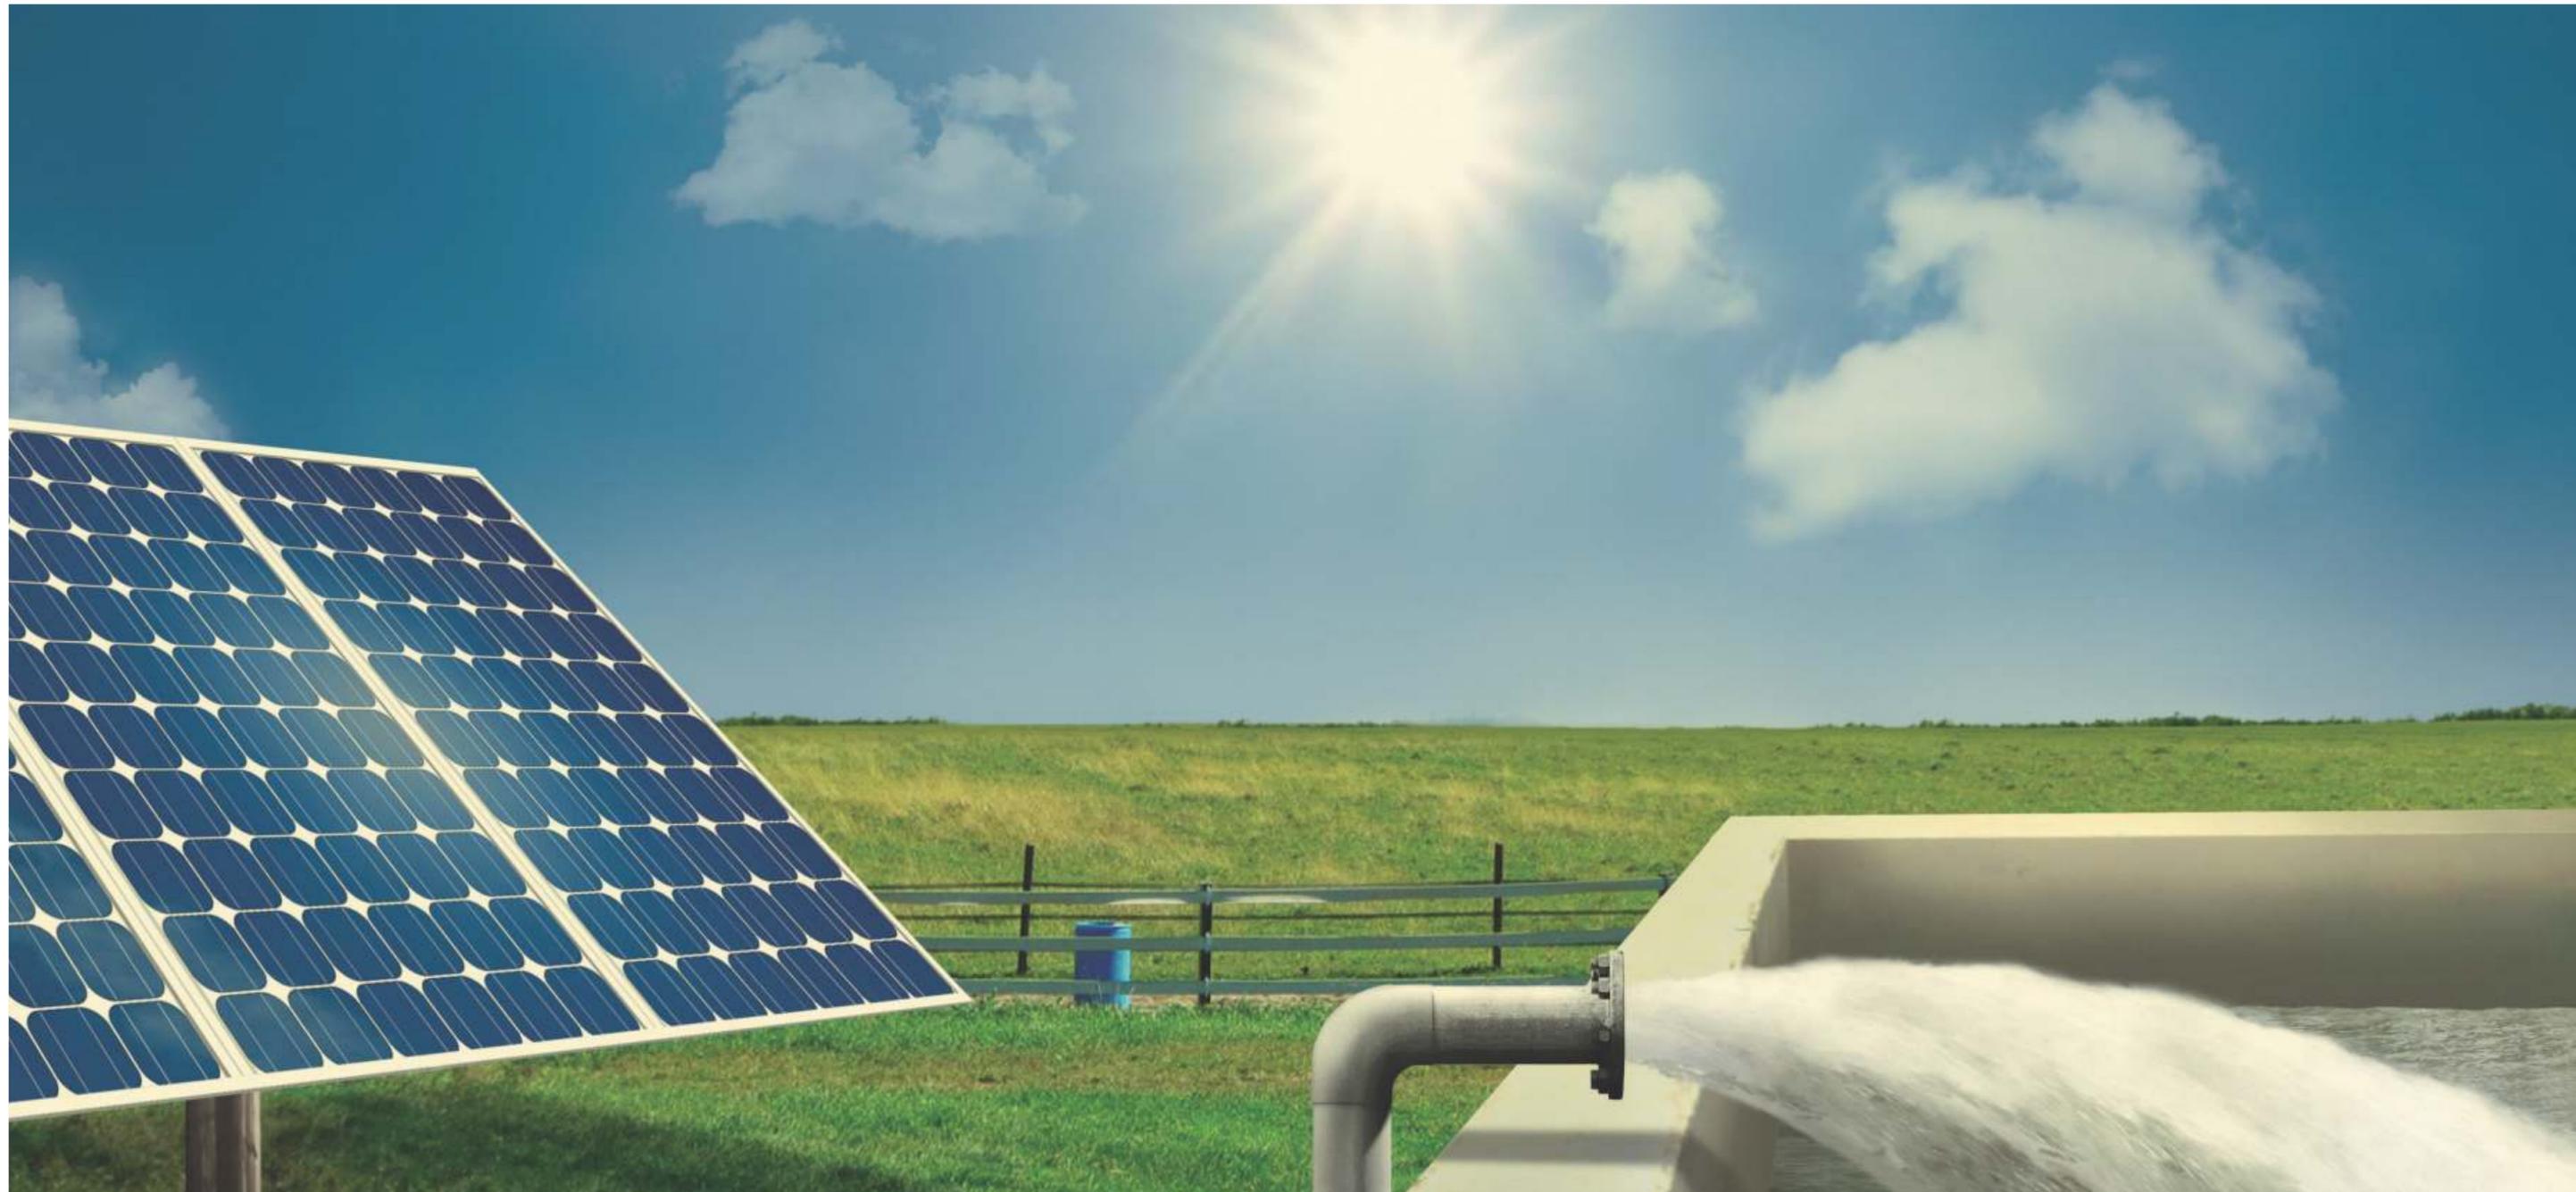

Products par excellence - Shakti Stainless Steel Submersible Pumps and Motors.

We have a strong product portfolio, consisting of a wide range of stainless steel pumps and motors to fulfil the requirements of agricultural, horticultural, industrial and domestic sectors as well as commercial/residential buildings. Our products offer best in class energy efficiency, low maintenance and longer life - thereby exemplifying premium quality.

Innovating for better products and a better world.

Innovation is embedded in our DNA. We constantly challenge the limits, think beyond the ordinary and come up with innovative pumping solutions that satisfy the needs of customers in a better and an efficient manner. We have a world class R&D facility with ultra-modern equipment.

We were the first company to present stainless steel submersible pumps in the Indian market, thus bringing about a revolution in the sector. Now in an effort to reduce the dependency on the traditional sources of energy, we have come up with Solar Pumps that utilize the energy of the sun to supply water - making farmers as well as Mother Nature happy.

The advantage of Shakti Solar Pump is that it can run easily & efficiently on both Solar (DC power) & Grid (Conventional AC power), giving very high discharge for maximum time. This way, Shakti Solar Pump automatically scores over other DC pumps which have the limited capacity of running only for 8 hours, thus being of no use at night when AC power is available.

Honors and accolades.

Our journey has been replete with numerous awards of global prestige. Among these are - Best SEZ Exporter Award 2012 by ECGC - Government of India and 2012 EPC Outstanding Company Award by EPC World Media. In June 2013, we were chosen as INDIAN POWERBRAND at Glam Me Awards held at Las Vegas, USA.

Various certifications - a proof of our excellence.

Various certifications recognize our commitment to excellence. Bureau of Energy Efficiency (BEE) has granted 5 star ratings to more than 260 of our pump models for their superior energy efficiency. We have also been certified by independent bodies like UL, CE, ISO, BIS, ISI, etc.

Giving back to society through CSR activities.

We value the big role that people have played in our success. With a view to give back to society, we undertake various CSR activities from time to time. Recently, through our SEVA initiative, we provided free medical assistance to people living in the rural areas of Madhya Pradesh.
